Business Office, 394  
Editorial Rooms, 167

**S**YSTEM and business management, backed and outshined by vision, and by the most hearty enthusiasm and public spirit, have demonstrated themselves as an unshakable combination in this year's state fair. Albuquerque is being congratulated and patting upon its figurative back upon the entertainment, the exhibits and the arrangements for the care of visitors.

It is especially in this latter matter of caring for our visitors that system and business management have demonstrated their value. A well organized information bureau has been supplied by loyal Albuquerque citizens with almost every available room in the city that can be spared for a visitor. The bureau has used the invaluable card index system and has kept its check up to the minute since Saturday night. The result is that although this city today is entertaining the largest number of visitors in its whole history, but very few visitors have had difficulty in finding accommodations to their liking, and these few have been largely those who undertook to find their way about without consulting the information office.

We can look forward complacently therefore to an even larger crowd of fair visitors tomorrow and Friday, knowing that this city's ability to care for a great crowd has been tested and found adequate, that our visitors not only are having a good time, but having it comfortably; and that we're ready for more when they come tomorrow.

### A FINE ORGANIZATION.

**O**UT of all of the many conventions being held in Albuquerque this week none perhaps is of more general interest than that of the State Geographical society, which perfected its organization this morning. The aims of this new organization are peculiarly interesting and their accomplishment will be of the greatest value. Briefly they are:

To place New Mexico correctly on the map; as to its railroads, its post-offices, its mountain ranges, its points of exceptional interest and its highways.

To preserve and assist in preserving the historic early nomenclature of the state.

To encourage interest in the study of New Mexico geographical facts and to supply the necessary information for that study.

The society was called here in organization meeting at the instance of the United States geological survey. Governor McDonald called the meeting after satisfying himself that similar organizations in other states have accomplished beneficial results and that they have found a fertile field for their activities.

The headquarters of the association, with its managing officer, are to be located in the State University; a decision which is wise from every viewpoint, since it will be not only the best and most efficient place from which to spread the information obtained, and at which to assemble it, but since the activities of the society centering in the institution will be of a very material value to the University.

### SCHOOL DAYS AT THE FAIR.

**N**OTHING gives a better illustration of the usefulness of the state fair, present and future, than the encampment of boys' and girls' industrial clubs, which forms a considerable feature of the fair grounds spread. Every county in the state save three is represented in this encampment by five or more boys and girls who have won their outing at the fair by earnest application to practical education in housekeeping, farming and stock raising. This trip to the fair was held out to them as definite reward for learning to be useful men and women.

That of itself makes the fair worth while to the mothers and fathers and the boys and girls of the state. But there is more. Each morning during their stay at the fair, play time for all of these little folks, they are conducted through the exhibit halls and the stock pens and before each ex-

hibit a man or a woman instructor who knows delivers a brief, practical lecture on the particular exhibit at hand.

Impressions gained in this way; facts acquired, are gained never to be lost. They are impressions that stick in youthful minds. They become indelible. It is a play day and a school day combined in the finest kind of way and to the end of the most useful play and the soundest education.

It is possible to figure out a thousand useful purposes this state fair serves. It is doubtful if there is any one of those purposes more genuinely useful to the state than this play day state fair education of the boys and girls of New Mexico, to be good farmers and competent housekeepers.

### DUAL PERSONALITY.

**I**N a public statement the man who was the friend and financial adviser of Rev. Newell Dwight Hillis, of Brooklyn, says that the noted clergyman has two distinct personalities—the amiable, gifted public orator and the ambitious speculator.

The friend said nothing new. Since he is human, it was to be assumed that Dr. Hillis had at least two personalities. No lesser authority on human nature than Oliver Wendell Holmes put forth the theory that every man has a great number of personalities which are evoked by the various persons with whom he came into contact. The average man carries several men within him. There is one his family knows, another his employer knows, an additional one known to each of his various intimates.

Probably the most matter-of-fact human in the world opens his eyes in the dark some night or peers into his mirror as he shaves and says: "Who am I, anyway?"

Hidden away in the heart of the generous, kindly man may be a demon of greed and cruelty; the forces of selfishness and of humanity may struggle for the possession of a character whose outward showing is fair and even.

Always, in everyone, the struggle, the same in everyone—a life-long combat between a lower and a higher self; between petty desires and larger ones; between the impulse to get happiness by clutching for it and to give it by helping others.

The contest is, in its general terms, the same in everyone—a life-long combat between a lower and a higher self; between petty desires and larger ones; between the impulse to get happiness by clutching for it and to give it by helping others.

### When McDonald Picked a Winner

(From the Santa Fe New Mexican.)  
From the start yesterday, and from conservative claims by business men who have been actively engaged in working for the thirty-ninth New Mexico fair, there is sound reason for the belief that the state exposition has at last got on its feet and has become a fair of which the state may be proud. It is at least certain that it has made more progress this year toward the goal of permanent success than in any preceding year. Organized, systematic, determined, county to county work has accomplished the result; and the guiding influence in all this efficiency has been R. E. Putney of Albuquerque, president of the state fair commission. Mr. Putney has been a regular dynamo and it has been through his own energetic personality that the fair has been financed and the business-like and ambitious plans of this year put into execution. Mr. Putney has made himself solid with the business men of the state as few business men have done before, and he will have the confidence of all the state in anything he undertakes for the state. And incidentally it is not amiss to compliment the governor of the state, William C. McDonald, on the very shrewd and excellent judgment he displayed in selecting Mr. Putney to head the state fair commission. He certainly picked a winner.

### YOU CAN'T FIND ANY DANDRUFF AND HAIR STOPS COMING OUT

Save your hair! Make it thick, wavy, glossy and beautiful at once.

Try as you will, after an application of Dandruff, you can not find a single trace of Dandruff or falling hair and your scalp will not itch, but what will please you most, will be after a few weeks' use, when you see new hair, fine and downy at first—yes, but really new hair—growing all over the scalp.

A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and sooty, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is immediate and amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance, the beauty and shimmer of true hair health.

Get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter, and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment. A 25-cent bottle will double the beauty of your hair.

## CATTLEMEN ASK GENERAL COUNCIL SEPTEMBER GREAT CLOSING OF THE DE TAXPAYERS MONTH FOR THE EL PASO PORT WILL MEET HARVESTS AT CLUB

**Ask State Department to Prevent Further Shipment out of Mexico in Hope Remnant of Cattle Owned There May be Saved.**

El Paso, Texas, Oct. 12.—Cattlemen of the southwest have sent requests to the state department at Washington asking that the importation of cattle, horses and beef products, including hides, from Mexico, be prevented. The memorial was wired by local cattlemen and ranchmen Monday.

The memorial sets forth as a reason for the request that American and other foreign interests in the northern states have been robbed of many head of cattle in the past. These cattle, allege the petitioners, have been shipped to this side of the line, where they have been sold by those who have stolen them. The closing of the ports of entry would prevent this in the future, they declare.

In addition, they allege that the Villa forces have announced publicly that they will devastate the country through which they pass, leaving nothing that can be used by the Carranza forces.

The losses to American cattlemen, declares the memorial, "have already amounted to vast sums, and it is hard to conceive to what extent they may grow."

### News and Gossip of Livestock and Stockmen

**F**OR the first time in the records of New Mexico fairs the livestock industry, New Mexico's greatest producer of ready money, is association to hold its annual convention in this city next spring. Secretary Harrell of the Panhandle association opened gaily decorated headquarters in the rear of the lobby of the First National bank today and was busy during the day meeting a steady stream of stockmen who called to get acquainted with him and with each other, and especially to renew old acquaintances.

It was an all-day reception which kept the bank lobby crowded during most of the day and which promises to keep it crowded right through the week. Added interest in better livestock of all kinds, it is predicted, will be one of the most important results of this year's state fair.

### STOCK NOTES FROM STATE PAPERS

**Amarillo Daily Panhandle:**  
The Panhandle and Southwestern Cattlemen's association is steadily adding to its membership, especially in the border states, sparsely represented counties of northern New Mexico.

**Carlsbad Argus:**  
Announcement was made the first of this week of the sale of the W. J. Barber interest in what is familiarly known as the "Swamp" ranch, on the plains seventy miles east of Carlsbad, to Oscar Thompson, John Hight and J. H. Barber of Carlsbad. The sale did not include all the Barber & Hight holdings, as Mr. Hight retained his interest, and only the Barber holdings were transferred. It is reliably reported that Mr. Barber sold his interest for a record price. While the number of cattle sold is not definitely known, it is said the deal involved something like \$100,000 or more, and is the largest single transaction in Eddy county in many years.

Mr. Barber will probably locate in Texas. His wide circle of friends regret his leaving Eddy county, where he has been identified with the cattle interests for many years. Mr. Hight and family will continue to reside at the "Swamp" ranch and will remain in the cattle business.

**Glenview Tribune-Progress:**  
Bippis & Davis, sheep owners of Hereford, Texas, sold 532 old ewes to a Mr. Caldwell at McLean, Texas, and they were today loaded out for their destination.

**Fort Sumner Review:**  
W. C. Wilson unloaded 800 head of cattle here Monday. They were shipped from Lawton, Okla., and were driven to Mr. Wilson's ranch up the river.

W. E. Orton shipped two cars of cattle to Kansas City on the 9th. Harry McKennon unloaded eight cars of cattle here on the 5th. They were shipped from Norman, Ark.

**Silver City Enterprise:**  
One of the largest land sales ever held in New Mexico took place Wednesday morning in Silver City when \$8,362.97 acres of state land located in Grant county was auctioned off to the highest bidder. The land is all non-mineral and non-forest and was

**Majority of the Twenty-Six Advisory Board Members Expected to Attend Gathering Friday Morning.**

### SCOPE OF WORK TO BE THOROUGHLY EXPLAINED

**Objects of the Association to be Placed Personally Before Taxpayers in Every County in State.**

At the meeting of the general council of the Taxpayers' association of New Mexico, to be held Friday morning at 9 o'clock in the Commercial club, President H. J. Hagerman, financial secretary, and others will give to the members of the council a careful and detailed statement of the aims and objects of the association and how it proposes to reach the results desired. The purpose of the explanation will be to make it possible for each county membership of the advisory board to explain to the individual taxpayers in his county the purpose of the organization and the way it will work, in conjunction with state and county officials and individual taxpayers, and the co-operation among individual taxpayers which is deemed necessary to the complete success of the undertaking.

The general council of the association consists of one member from each county and a large majority of the members are expected to be present at the Friday morning meeting. It is the purpose of the Taxpayers' association to the individual taxpayers of the state; to interest them through a plain showing of the results to be attained, and to bring them into active membership and co-operation.

Every man is bringing membership suggestions to the organization office here, and the successful prosecution of the work is assured. Mr. James, who was elected to the office of director this week has gone to Santa Fe to begin his work. His family has arrived there and the activities of the association will get under full headway immediately.

### PLANS COMPLETED FOR PAVING PLAZA IN OLD LAS VEGAS

Las Vegas, N. M., Oct. 12.—Plans for the paving of the Plaza were considered and approved at the meeting of the council of the west side last evening. The plan approved is the plan known as No. 1, drawn by George Morrison. The specification calls for a parking space around the stone wall of the Plaza of an average width of 25 feet. On the north side there will be 25 feet of paving, on the south side 25 feet, on the west side 25 feet and on the east side 25 feet. The total cost will be \$17,625, or an individual cost of \$5.75 per foot. It is the hope of the council that the contract can be let this fall and have the grading done at once so that the concrete may be laid in the early spring.

Fifty-six thousand acres of the land sold Wednesday morning lies in the extreme southern end of Grant county in the "hot" line within the republic of Mexico acquired by the Gadsden purchase. The purchaser of this large tract of land was the Warren Land and Cattle Co., better known as the U-S-R outfit, one of the largest cattle companies in the world, owning extensive ranches and cattle in Mexico.

The rest of the land lies in small tracts throughout Grant county, principally bordering the Gila and Mangrove valleys, although one big tract bid in by the China Copper company lies to the southeast of Silver City.

All the land was bid in at the minimum price of \$2 an acre with the exception of several small tracts which brought \$3.95 and \$4.91 respectively from the Victoria Land & Cattle Co.

The following are the buyers and the amount of land purchased in each parcel:  
Henry Woodrow, 566.11 acres; Winfield Clark, 240 acres; T. J. Clark, 400 acres; Elmo McMillen, 3,974.01 acres; A. A. Gerald, 190 acres; E. S. Edwards, 2,450 acres; China Copper Co., 2,446.25 acres; Jessie McKeen, 159.47 acres; H. O. Walde, 450 acres; Jesse Loreal, 180 acres; C. E. Fuller, 160 acres; Mr. Pruitt, 950 acres; Dr. L. T. Tabon, 240 acres; Martin Mallon, 510 acres; Ed. Dickinson, 3,769.29 acres; Luby Wright, 480 acres; John Thompson, 2,129 acres; Young Bounds, 7,265.30 acres; W. B. McWhorter, 2,500 acres; John D. Weems, 650.40 acres; Victoria Land & Cattle Co., 80 acres; Victoria Land & Cattle Co., 160 acres; Hodge Muddox, 120 acres; Victoria Land & Cattle Co., 800 acres; S. H. Dunnehan, 1,569.89 acres; Victoria Land & Cattle Co., 40 acres; Burke Turner, 843.51 acres; C. J. Maple for the Warren Land & Cattle Co., 48,496.57 acres.

**Portales Herald:**  
The William Oldham Cattle Co. last week shipped three cars of cattle to the Kansas City market. It was part of the herd which has been on their ranch south of town and which they did not care to keep over winter.

G. M. Williamson, who accompanied the shipment, said the price received was very satisfactory.

### Weather Conditions and Rain-fall About Right Says Monthly Report of the Weather Bureau

Santa Fe, N. M., Oct. 12.—General climatic summary for New Mexico, September, 1915.

Good local showers that covered much of the state occurred from the 2d to 4th of September and thereafter little rain fell till the 13th, when again good general showers occurred. On the 14th-20th, and a fourth on the 22-24th, while local showers occurred over southeast counties on the 21st-23d. The average precipitation for the month was in excess of the normal, for the state as a whole. Over the eastern border counties, below the Canadian, and over the lower Pecos valley, the Sacramento valley and adjoining mountain areas, the lower Rio Grande valley, as well as a few other localities in the central and southern portions of the state, the precipitation exceeded three inches, and it exceeded five inches over large areas in Chavez and Eddy counties. On the other hand, northern mountain areas and the southwest and the northwest counties received light rainfall and show a considerable deficiency. Portions of western Mora and western San Miguel counties were also greatly deficient in precipitation.

Heavy local downpours occurred at many stations during the several showers period, reaching a maximum fall of 4.40 inches at Roswell, northeast Chavez county, on the 17th. It accompanied a few of the storms, but as a rule little damage resulted. The storm at Roswell and vicinity on the 23rd of the month, however, resulted in a considerable loss.

The warm southern valleys of the state had an average temperature for the month of about 70 degrees; the central valleys 65 to 68 degrees and the northern plateau and mountain areas 51 to 55 degrees and upward to 60 degrees, according, largely, to altitude. A deficiency in temperature was general, with the exception of a few small areas. Cool weather prevailed at the beginning of the month but warm weather quickly followed, reaching the maximum of the month, as a rule, from the 10th to 12th, and remaining moderately high until the 20th. Quite a number of northern and western districts, however, experienced a brief cold period on the 14th-15th, with fairly general light frost. From the 20th to the close of the month comparatively cool weather prevailed, with the lowest temperatures of the month, generally, on the 27th or 28th. Heavy to killing frost occurred in many northern districts during this period, and light frost was observed over central mountain areas, but no frost occurred over the southern counties, and no damaging frost over the central districts. The month as a whole was highly favorable for the maturing and harvest of late small grain, corn, cotton and fodder crops.

### BEEF CATTLE MAKE CONSERVATIVE ADVANCE IN K. C. MARKET

Kansas City Stockyards, Oct. 11.—Good beef cattle advanced somewhat last week after Monday, and closed the week fully steady. There was a strong demand for feeders, and they made a slight gain for the week. Plain stockers remained steady. Receipts after Monday were moderate, giving the market a chance to recuperate. The eastern embargo against livestock from Chicago is still on, and eastern orders continue to help the market here on beef cattle. Stocker and feeder shipments to the country from here last week were 41,000 head, the largest of the year. Receipts here today are 34,000 head, market steady to 10c lower on stockers and feeders, of which two-thirds of the supply consists, and killing grades largely 19 to 20 cents lower. Panhandle fed steers reached \$8.75, and grass beef steers from Texas \$7.25. Fourteen cars of Mr. Burnett's feeders, from Canadian, Texas, sold at \$7.50, 1089 pounds average. Colorado consignment, scarce liberal, including beef steers at \$6.65 to \$7.00; feeders at \$7.00 to \$7.15; cows \$5.40 to \$5.20. A five-car drive of Colorado feeders brought \$5 here last week, and a car of show feeders from Durango brought \$5.15. A car of Colorado hogs sold here today, big old sows, at \$7.80. Five stags to \$7.00. These were shipped from Fowler, Colo., for Denver and reshipped to this market. At a good margin above Denver bids, thirty cars of cattle arrived from Baker, Oregon. This train fed only twice en route, en route at Montpelier and again at Cheyenne, making the run from Cheyenne to Kansas City in 25 hours over the Union Pacific cut-off from Gilman. This string included beef steers at \$7.25 to \$7.40, cows at \$5.50 to \$6.50.

Sheep receipts today were 14,000 head, market strong. Fat ewes sold at \$5.75 to \$6.00, Utah and Colorado lambs at \$4.50 to \$5.75, Arizona ewes weighing 100 pounds at \$6.00, feeding lambs from all the western ranges at \$5 to \$5.25, breeding ewes from Utah \$5.75, young New Mexico breeders \$7.00, Colorado feeding ewes \$5, breeding ewes \$6. The end of the range shipping season is apparently in sight, and packers are feeling the shortage this year keenly, one of the big killers here stating today that the kill of his home for the fall season at all the markets was nearly 20 per cent short of last year. Packers expect strong prices during next three months, because of shortage, and feeder demand will continue strong as long as any feeders or breeders are available. Prospects ahead look good for shippers.

J. A. RICKART.

### DONA ANA COUNTY TO MAKE EXHIBIT OF HIGHWAY BUILDING

A feature of the state road convention to be held in Santa Fe October 18, 19 and 20, and which will attract the attention of all interested in roads, will be the road exhibit from Dona Ana county. The chief feature of this exhibit will be a large relief model map, showing the road system of the county, designating the roads nearly, so as to indicate their condition and how constructed, and giving all data of interest to road building and highwaymen. This model map will show not only the road system, but the methods of road construction.

Letters from all over the state indicate an unusually keen interest in the Santa Fe road convention, and an unprecedented attendance is looked for. Senator Thomas H. Catron has just consented to address the convention on the subject of "Federal Aid for Good Roads."

**Mazatlan News:**  
Mazatlan, who is bringing all his cattle out of Mexico, shipped in 1200 head to Mazatlan, Tuesday. They were taken to the ranch on near Guadalupe which is in charge of Sheep Ranch, and we understand that more will follow the shipment in the near future.

## She Will Recover

So her doctor said. Her friends and neighbors felt sure of it too. They have used Peruna themselves and know of its merits. That old cough that had worried her for years and years, for which she had taken all sorts of cough medicines, has disappeared. Peruna is doing the work. She will recover. Indeed, she has recovered.

Her name is Mrs. William Hohmann, 2764 Lincoln Ave., Chicago, Ill. She had suffered with catarrh of the bronchial tubes and had a terrible cough ever since a child. As she got older she grew worse. She coughed both winter and summer. Had to sit up at night. Could not sleep. "But all that has left me now. Peruna has cured me."

There are others, and there is a reason.

and by means of small models the machinery with which the work has been accomplished. This relief model map is now being completed by J. P. Adams of Santa Fe, an expert in the work.

Another feature of the Dona Ana county road exhibit will be a large display of hand-colored photographs, showing the actual progress of road building and road maintenance as carried on in that county. These photographs are enlargements of carefully made size, mounted on wall displays, and show every step of road building, from the digging and spreading of the gravel at the pits to the completed finished gravelled road and the maintenance of that road by means of motor trucks. The Dona Ana county people believe that the educational value of this exhibit will be very great, since it visualizes the whole scheme and process of road building, and at a glance sets forth the most improved methods for road building and maintenance under New Mexico conditions.

This road exhibit will also be the central feature of the Dona Ana county exhibit at the state fair at Albuquerque this week, as arrangements have been made to give it prominence, and the exhibit will be completed in time for the fair.

Letters from all over the state indicate an unusually keen interest in the Santa Fe road convention, and an unprecedented attendance is looked for. Senator Thomas H. Catron has just consented to address the convention on the subject of "Federal Aid for Good Roads."

**Mazatlan News:**  
Mazatlan, who is bringing all his cattle out of Mexico, shipped in 1200 head to Mazatlan, Tuesday. They were taken to the ranch on near Guadalupe which is in charge of Sheep Ranch, and we understand that more will follow the shipment in the near future.
